Castro Valley, CA | (510)514-9368 | prinstar.darko@gmail.com | [LinkedIn](#) | [GitHub](#)

EDUCATION

California State University, East Bay - Hayward, CA

May 2026

B.S. Computer Science

GPA: 3.95

Organizations /Awards: BET McNair Scholar, MESA Student, University Honors Programs, Dean's List

Relevant Coursework: Computer Organization and Assembly Language, Computer Networks, Operating Systems, Data Structures, Analysis of Algorithms, Website Development, Database Architecture

PROJECTS

E-Commerce Tech Store Website

Jan 2026 – Present

JavaScript, HTML, CSS

- Built a full-stack e-commerce website that allows users to browse, search, and purchase technology products through a secure online platform. Implemented product listings, shopping cart functionality, and order checkout workflows.
- Designed and developed both frontend and backend components, created RESTful APIs for product and order management, and integrated payment processing and authentication features.
- Delivered a responsive, user-friendly shopping experience and strengthened skills in full-stack development, state management, and database design.

Social Media Analytics Dashboard

August 2024 – Present

Node.js, React, MongoDB

- Developed a full-stack analytics platform that visualizes user engagement metrics across multiple social media platforms to help users track performance insights.
- Built RESTful APIs, implemented OAuth for secure authentication, and optimized MongoDB queries to improve backend performance.
- Improved data retrieval time by 30% and gained hands-on experience in full-stack development, authentication flows, and database optimization.

WORK EXPERIENCE

California State University, East Bay (Machine Learning, Data Analysis, Research)

June 2025 – Present

Undergraduate Research Assistant, McNair Scholars Program

- Develop predictive models to identify key indicators of student academic success using Python and scikit-learn.
- Perform data preprocessing, feature engineering, and model evaluation; collaborate with faculty to refine methodology and interpret results.
- Generated data-driven insights to support institutional decision-making while strengthening skills in machine learning and applied research.

Kid A Workshop (STEM Education, Curriculum Design, Leadership)

August 2023 – December 2023

STEM Program Facilitator

- Led project-based STEM workshops introducing students to coding and engineering through hands-on learning activities.
- Designed and delivered interactive lesson plans; partnered with educators to integrate digital tools into classroom instruction.
- Boosted student engagement by integrating interactive coding platforms and live demonstrations, resulting in more consistent participation and question-asking during sessions.

TECHNICAL SKILLS

Languages: Python, C/C++, Java, JavaScript, SQL, Lisp, Kotlin

Frontend: React, HTML, CSS

Backend: Node.js

Databases: MongoDB

ML/LLM: PyTorch, Hugging Face, Weights & Biases

Developer Tools: Git, GitHub, GitLab
